å

Ujvari and Luse S RN emerging from the active site of RN polymerase II interacts with the Rpb subunit Nat Struct Mol Biol

æ

Shogren Knaak M shii P Sun J M Pazin M J avie J R and Peterson L histone K acetylation controls chromatin structure and protein interactions Science

Xu Zhang K and runstein M cetylation in histone globular domain regulates gene expression in yeast ell

Tsukada Y ang J rdjument romage P Warren M orchers P Tempst P and Zhang Y histone demethylation by a family of Jmj domain containing proteins Nature

Lee zhkova Li Pattenden S Tansey W P and Workman J L The proteasome regulatory particle alters the S P coactivator to enhance its interactions with transcriptional activators ell

ø

Schalch T uda S Sargent and Richmond T J X ray structure of a tetranucleosome and its implications for the chromatin fibre Nature

hen X Piller M Sancak Y and uller M T Tissue specific T s counteract Polycomb to turn on terminal differentiation Science

an X hou M and Struhl K ctivator specific recruitment of Mediator in vivo Nat Struct Mol Biol

# Articles for presentation

ø

Kaneko S and Manley J L      The mammalian RN polymerase II terminal domain interacts with RN to suppress transcription coupled end formation Mol cell

å

Wei L Wu Q Vega V      hui K P Ng P Zhang T Shahab Yong P      u Y Weng Z Liu J Zhao X  
hew J L Lee Y L Kuznetsov V      Sung W K Miller L      Lim Liu T Yu Q Ng P P and Ruan Y  
global map of p transcription factor binding sites in the human genome cell

Xie X Lu J Kulbokas J      olub T R Mootha V Lindblad Toh K Lander S and Kellis M      Systematic  
discovery of regulatory motifs in human promoters and UTRs by comparison of several  
mammals Nature

outure J      ollazo      Pauk      and Triebel R      Structural basis for the methylation site  
specificity of S T      Nat Struct Mol iol

å

Jin      Kato K      himura T Yamasaki T Nakade K Murata T Li P Pan J Zhao M Sun K      hui R      to T Nagata  
K Porikoshi M and Yokoyama K K      Regulation of histone acetylation and nucleosome assembly  
by transcription factor J P Nat Struct Mol iol

ean      On a chromosome far far away L Rs and gene expression Trends enet

ø

Metzger      Wissmann M Yin N Muller J M Schneider R Peters P      unther T      uettner R and Schule R  
LS      demethylates repressive histone marks to promote androgen receptor dependent  
transcription Nature

Schramke V Sheedy      M enli      M onila      kwall K Pannon J and Ilshire R      RN  
interference directed chromatin modification coupled to RN polymerase II transcription Nature
